

This is to certify that:

Optima Contracting Ltd

have successfully sent

20 unused printer cartridges

for reuse through the *CartridgeForest* unused cartridge service, and as a result planted

200 trees

with our partner *Trees for the Future*.

Estimating 180kg of CO₂ saved per tree planted — including the energy saving of cartridge *reuse* instead of landfill or simply recycling — this should help reduce CO₂ by approximately **36,000kg** over the lifetime of the trees.

With great thanks,

The [CartridgeForest.com](https://www.cartridgeforest.com) Team

Optima
